

“BETTY” Bonus Program

**For accuracy in documenting
Activities of Daily Living**

Activities in Daily Living (ADLs) are an important status of a resident’s function and ability to care for themselves. Accurately documenting ADLs is so important that Caraday launched the Betty Bonus program to reward accuracy each month.

A \$250 monthly drawing will be held at every community that meets the minimum eligibility criteria of 90% compliance.

During their first month of participation, CNAs will need to score 100% on the ADL quiz, which measures understanding of key concepts from the ADL training video (available in English and Spanish).

Then each subsequent month, winners will be randomly selected from full-time CNA team members who do not make repeated ADL errors (as measured by ADL correction notes).
