

Geoff Chudleigh, MBA, LNFA

Administrator, Hearthstone

Unlike traditional nursing homes, Hearthstone Nursing & Rehabilitation specializes in caring for high acuity short-term patients and providing compassionate long-term care. Patients who have recently been hospitalized, undergone surgery, received hip or knee replacement surgeries, or have a chronic illness will find an ideal community with comprehensive care and support services delivered by professional caregivers and therapy teams.

Geoff brings a robust background in leadership, quality improvement, and healthcare to Hearthstone's team members and residents. He has been an administrator since 2011, and he worked as a semiconductor process engineer before making the move to healthcare management. Growing up, he had two parents that were clinicians in healthcare; his father was a physician, and his mother was a speech therapist. With a passion for quality improvement, he has been actively involved in the Quality Award Program through the American Healthcare Association. He's also mentored over a half dozen administrators-in-training, helping to grow a new generation of promising leaders in long-term care.

Geoff has a degree in Chemical Engineering from Texas A&M University, as well as an MBA in Entrepreneurship from the Acton School of Business. He has a philosophy of serving other team members so that they, in turn, can better serve their residents. He is honored to be serving as the administrator at Hearthstone.

When not working with the team members and residents at Hearthstone, Geoff enjoys outdoor activities like hiking, hunting and water sports. He is supported by his wonderful wife Sophie and two amazing daughters: Emma (20) and Violet (15). He comes from a larger family with 5 siblings. As a family they enjoy coming together to cook, discovering good food, and celebrating the blessings of life.
